

The **globalaai** Paper Plane Project

This paper plane will connect the world for social awareness and safety for anaphylaxis or life threatening allergies.

1. Orient the template so that the "UP" arrow is at the top of the page. Then flip the paper over so that none of the fold lines are showing.

3. Fold the left side over again and crease along fold line 2. Repeat with the right side.

2. Fold the top left corner down toward you until fold line 1 becomes visible. Crease along the dotted line and repeat with the top right corner.

5. Fold the right half of the plane over the left half along fold line 4 so that the outside edges of the wings line up.

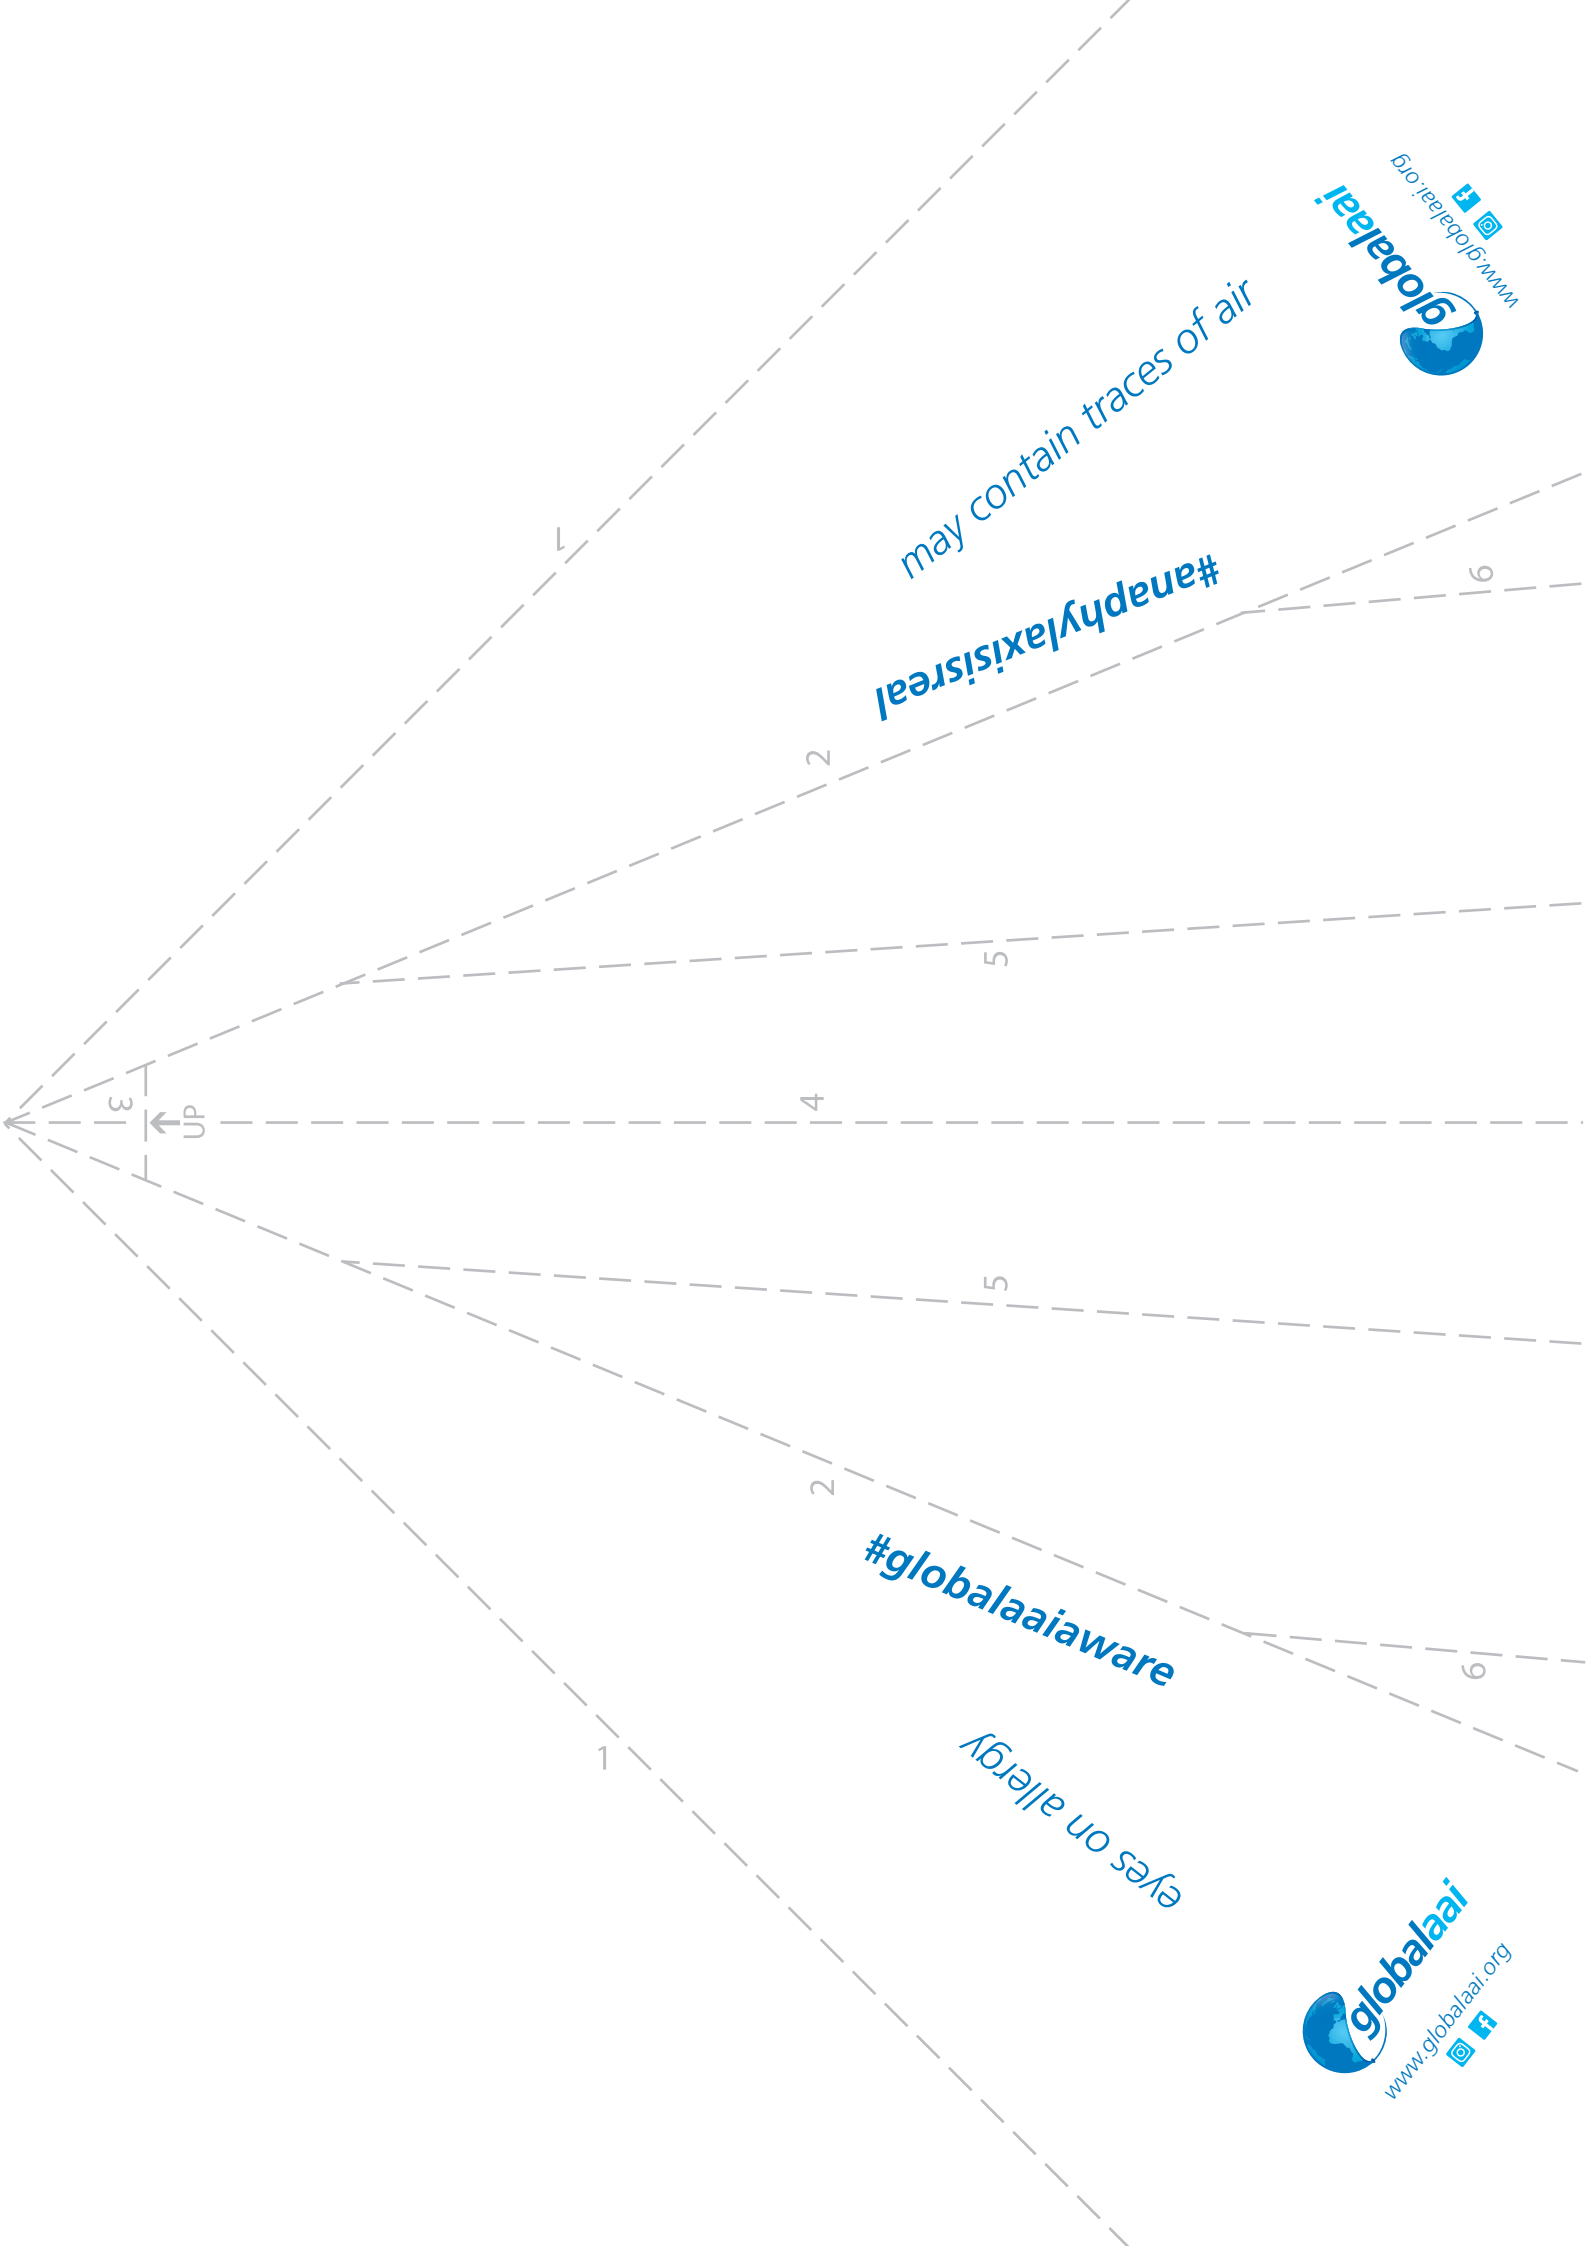

4. Fold the nose down and toward you along fold line 3.

6. Fold the wings down along fold lines 5 and the winglets up along fold lines 6. Add wing dihedral by tilting the wings up slightly away from the fuselage. The wings will have a slight "V" shape when viewed from the front. You are ready to fly!

*Fold this paper plane to be #globalaaiaware,
Send us a pic, fly it on its way with care.
Spend a moment reflecting on allergy,
Anaphylaxis, and remember to feel free!
Together a voice for change will be clear,
Connecting the world to live without fear.*
